DO YOU WANT :

✓ *... a FIXED LOCATION for Hoof-Care? ... NO*
✓ *SETUP TIME for Hoof-Care? ... a System*
✓ *that is ALWAYS READY TO GO,*
and needs NO EXTRA SPACE ?

THEN

SPEED-FIX

IS RIGHT FOR YOU

info@schnelleklauenpflege.at

SPEED-FIX

The Four Steps to Fast Hoof-Care

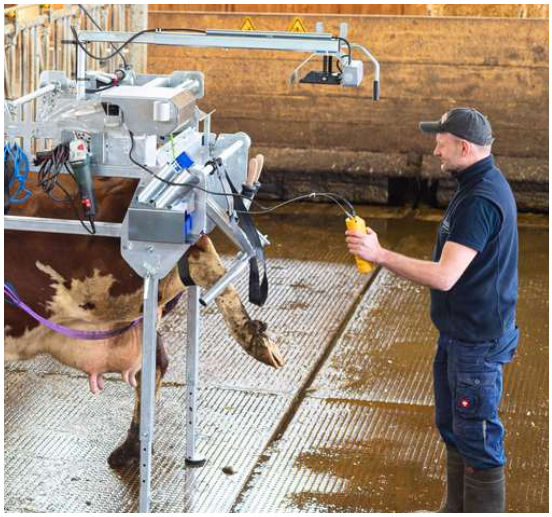

The Stand is raised and the herd has free access to the feed gate!

The cow locks itself in, and is in a familiar area-
so ***alone and stress free*** in the Speed-Fix

The Stand is Lowered by Electric Winch into Position

Now the care can begin -
no other preperation is needed

Now the Hoof-Care is Applied.

The Hind Leg is moved into postion using the electric winch saving extra physical effort.
Perfect Fixation of the Hoof is achieved with our Duo-Fix System.

Raise the Stand, Done.

The Stand is raised with the winch back to its park position, and the feed area is again, completely free.

SPEED-FIX

High cost-benefit ratio

Why a Speed-Fix Really Pays Off

Lameness is one of the biggest economical stresses on dairies.The effect on the milk production, fertility, and health of the cattle can be enormous and expensive.

Overview:

- Reduced MilkProduction
- Longer periods between calving
- Fertility issues
- Vet and Handling Costs
- More work & Lost time
- Early Slaughter and or Replacement

Example Costs Per Operation (With a 28% Lameness Rate)

Cattle	Lame Cattle	Extra Costs / Year
20 Cows	6 Cows	≈ 1.590 - 3.700 €
40 Cows	11 Cows	≈ 2.900 - 6.800 €
60 Cows	17 Cows	≈ 4.500 - 10.500 €

Source:Kofler, J., Burgstaller, J., Fuerst-Waltl, B., Steininger, F., Egger-Danner, C. (2021). Auswirkung von Lahmheit auf die Milchleistung bei Milchkühen in Österreich – Ergebnisse aus dem Efficient-Cow-Projekt.
Je nach Schweregrad bis zu 617 euros pro Lahmheit

Immediate Handling = Immediate Savings

With a Speed-Fix there is ALWAYS a handling stand ready to go

No Prep-time No wasted space

What our Boss has to say:

Farmer, developer of the Speed-Fix, and head of an agricultural plannings office

For which size farms is the Speed-Fix reccomended?

Josef Ametsreiter: *„One of smallest customers has five Cows in Southern Tirol, the largest an operation with 350 cows. The larger operation has a professional come for the entire herd three times a year, however, for quick handling inbetween, the farmer relies on his Speed-Fix. The biggest advantage he says: There's nothing to prep, everything is ready. It's so easy to use the Speed-Fix, right by the normal operations."*

Is the Speed-Fix mainly for spot handling, or can it be used for regular maitenance for the entire Herd?

JosefAmetsreiter:*„Many of our customers,with operations ranging up to and around 35 cattle often make the complete hoof care for their herd with the Speed-Fix. For the larger operations most have a professional come two to three times a year for regular grooming, and utilize the Speed-Fix for any issues that occur inbetween. The ability to quickly address issues, as everything is always prepped is one of its biggest advantages."*

For which operations, would you say, is the Speed-Fix beneficial?

Josef Ametsreiter:*„For any operation with feedfences, that doesn't have a stand the Speed-Fix is the solution!"*
„Especially for Dairies, theres not a better investment than in immediate Hoof-Care. For most operations the Speed-Fix had paid for itself in 1-3 years.

From our Customers

Alois Utz
80 Dairy Cows
DE - 93453 Neukirchen

"I've had the system in operation since fall 2018 – it's easy to work with because it takes up no space and is always ready to use. The position on the feed fence gives multiple advantages at once, the cow is in familiar surroundings, locks itself in, and can eat at the same time. With an electric winch, the foot can be lifted into position, and after the treatment the system can be pulled up again and the space is free again. Top device!"

Andreas Ehrenhuber
30 Dairy Cows
AT - 4554 Oberschlierbach

„The mounting on the feed fence went easily and quickly. Working with the Speed-Fix is just great. In just a few steps, the cow is ready for hoof care – without having to pull the cow through the barn on a rope, completely stress-free. Super! :)"
